SUBJECT INDEX

Air classified potato starch 101
Amylase and bread properties 127
  to monitor pasteurization of egg white 445
Amyloglucosidase in soy sauce fermentation 543
Analytical techniques,
  HPLC 1
  Near infrared reflectance 13
Anthocyanin separation 283
  stability and use in foods 421
Apple juice extraction 379
Arrack, volatiles in 437
Ascorbic acid in frozen capsicums 671
Atholl brose 587
A_w,
  evaluation by freezing point depression 21
  lowering in meat during immersion cooking 609, 621
  of salted fish products 31
  prediction 219, 409, 553, 597

Baking properties of bread 127, 291
  prediction of 433
Bakla-modified tempeh 39
Banana juice, clarification by pectinolysis 115
Batter expansion test to predict bread baking quality 433
Batters, cake, rheological studies of 153
Biscuit crispness, measured by ultrasound 167
Blanching, effect on ascorbic acid and colour of frozen capsicums 671
Blood globin
  separation by CMC chromatography 81
Blue Whiting,
  Southern, storage life of 185
  consumer preference for 655
Book Reviews,
  Additive Migration from Plastics into Food 225
  Advances in Catering Technology 708
  Advances in Fish Science and Technology 329
  Basic Food Microbiology 451
  Chemistry and the Food System 706
  Commodity Year Book 1980: The Public Ledger 227
  Effects of Heating on Foodstuffs 94
  Fibrous Proteins: Scientific, Industrial and Medical Aspects 226
  Fluidization 705
  Fodder Biofactors, Their Methods of Determination 567

Food Analysis Laboratory Experiments 330
Food Control in Action 332
Food, People and Nutrition 331
Food Processing Waste Management 97
Food Sanitation 454
Functionality and Protein Structure 93
Fundamentals of Food Process Engineering 707
Handbook of Sugars 569
ICUMSA: International Commission for Uniform Methods of Sugar Analysis Report 96
Le Conserve di Pomodoro 710
Nutrition and Food Processing 452
Polysaccharides in Food 224
Seaweeds and their Uses 710
Soy Protein and Human Nutrition 94
Spices and Condiments: Chemistry, Microbiology, Technology 568
The Science of Food 223
The Technology of Wine Making 453
Tropical and Subtropical Fruits 570
Botulinum toxin, production in cured meats 337
Bread baking properties, prediction of 433
properties, and α-amylase 127
use of potato flour in 291
Broad bean, to modify soy bean tempeh 39
Browning of stored orange juice 535

Cake batters, rheological studies of 153
Calcium, effect on shelf-life of cream-based liqueurs 587
Canned foods, conversion factors in thermal processing of 229
Capsicums, frozen, ascorbic acid and pigments of 671
β-carotene as a food colour 421
Cassava, effect of processing on cyanide content of 299
predicting quality of products 447
Chicken, frozen, water content of 683
Chitosan gobules 467
Chlorinated flours, effect in cake batters 153
Chromatography to separate blood globin 81
Clarification of banana juice by pectinolysis 115
Clostridium botulinum
growth in pasteurized cured meats 239, 267
toxin, production, prediction of in pasteurized meats 337
CMC chromatography to separate blood globin 81
Colour of stored orange juice 535
frozen capsicums 671

Colours, natural
anthocyanin separation 283
stability and use 421
Conversion factors in thermal processes 229
Counter-current diffuser for apple-juice extraction 379
Cream-based liqueurs, shelf-life of 587
Crispness of biscuits measured by ultrasound 167
Cured meats,
growth of *Clostridium botulinum* in 239, 267
toxin production by *Cl. botulinum* in 337
Cyanide content of processed cassava 299

Dioscorea, flour from 303
Diffusion, counter-current, for apple juice extraction 379

EEC Regulation 2967/76 on water content of frozen poultry 683
Eggs, test for evaluation of storage history 701
Egg pasteurization, monitoring by amylase test 445
Energy survey analysis 481
Enzymes,
Amylolytic to monitor egg pasteurization 445
Pectinolytic, to classify banana juice 115
Erucic acid, low-, rapeseed oil, hydrogenation of 519, 527
Ethyl acetate production by *Saccharomyces rouxii* 177
Exophiala werneckii in salted fish 505
Extrusion method,
to prepare fish crackers 51

Factory energy survey analysis 481
Flavour charges in frying oils catalysed by metals 313
Fish, consumer preferences for 655
crackers, extruded 51
deboned minced, frozen storage of 199
salted, a_w of 31
salted, fungal growth on 505
storage life of 185, 357
texture measurement of 493
Flour, α-amylase in, and bread properties 127
improvement, and effect on cake batters 153
parboiled rice, properties of 403
potato, in bread 291
prediction of bread baking quality 433
proteolytic enzymes in, and pasta quality 213
yam 303

Fluidization,
of potato chips 59
Freeze drying, optimization of process 637
Freezing point,
depression, to evaluate a_w 21
Fresh water prawns, shelf life of 357
Frozen capsicums, ascorbic acid and pigments of 671
Frozen scampi, microwave attenuation by 647
Frozen poultry, water content of 683
Frozen minced fish, storage of 199
fish, texture of 493
Frying oils,
flavour changes caused by metals 313
Functional properties of textured milk proteins 575

Gari (cassava), cyanide content of 299
Gelling power of pectins, changes during storage 367
properties of salt soluble turkey protein 549
Globin, separation from blood by CMC chromatography 81
Gluten, wheat, solubilization of 561

Heat treatments, conversion factors in 229
Heterocyclic compounds, nitrogen, in oils catalysed by metals 313
High pressure liquid chromatography—See HPLC
HPLC, recent applications 1
Hydraulic transportation of potato chips 321
Hydrogenation of oil, evaluation of iodine number and NMR 67
rapeseed oil 519, 527

Infrared, near, analysis 13
Iodine number,
correlation with proton relaxation times 67
Isoascorbate, effect on *Clostridium botulinum* 239, 267, 337

Juice,
clarification of banana 115
extraction of apple 379

Koji, enzyme activity in 543

Maltase in soy sauce fermentation 543
Meat, cured,
Clostridium botulinum in 239, 267, 337
Meat flavour, training, taste panelists for 661
Meat protein, gelling property of 549

Merlangius, consumer preference for 655
Metals as catalysts for flavour changes in frying oils 313
Micromesistius, consumer preference for 655
  iced, storage life of 185
Microwave attenuation by frozen scampi 647
Milk proteins, textured, functional properties of 575
Moisture content, determination in tubers 457

Nephrops norvegicus, frozen, microwave attenuation by 647
Nitrite, effect on *Clostridium botulinum* 239, 267, 337
Nuclear magnetic resonance spectroscopy,
  correlation with iodine number 67
  to determine oil and water in olive husk 629

Oil,
  cashew kernel, effect of refining 513
  determination in olive husk by NMR 629
  hydrogenation, determination by iodine number and NMR 67
  in frying
    effect of metal ions 313
    rapeseed, hydrogenation of 519, 527
Olive husk, oil and water content of 629
Orange juice, stored, browning of 535
Osmosis dehydration 609, 621
Ottawa texture measuring system 493
Oxygen transmission through plastic films 73

Packaging films,
  oxygen transmission through 73
Palm wine distillate, volatiles in 437
Parboiled rice flour, properties of 403
Pasta quality and semolina flour enzymes 213
Pasteurization of egg, monitoring using amylase 445
Pectinolytic enzymes to clarify banana juice 115
Pectins, stability of 367
pH, of frozen fish, effect on texture 493
  meat, effect on *Clostridium botulinum* 239, 267
  effect on gelation property 549
Physical characteristics of air classified potato starch 101
Plastic films,
  oxygen transmission through 73
Polyphosphate, effect on *Clostridium botulinum* 239, 267, 337
Potato,
  chips, fluidization of 59
  chips, hydraulic transportation of 321

flour, for wheat flour replacement in bread 291
starch, air classified 101
Poultry, frozen, water content of 683
Prawns, fresh water, shelf-life of 357
Preparative chromatography of blood globin 81
Pressure, optimal, in freeze drying 637
Protein, textured milk, functional properties of 575
Proton relaxation times on maize oil
correlation with iodine number 67

Rapeseed oil, hydrogenation of 519, 527
Refining of cashew kernel oil 513
Rheological studies of cake batters 153
chitosan globules 469
Riboflavin as a food colour 421
Rice, parboiled, properties of flour from 403
Ross's equation for a_w prediction 219, 409

Saccharomyces rouxii, production of ethyl acetate by 177
Salted meat, growth of *Clostridium botulinum* in 239, 267
toxin production by *Cl. botulinum* in 337
Salted fish products,
a_w of 31
fungal growth on 505
Scampi, frozen, microwave attenuation by 647
Semolina flour enzymes and pasta quality 213
Sensory evaluation of blue whiting and whiting 655
meat flavours, training of panelists for 661
Snack foods, prepared by extrusion 51
Soy bean tempeh modified with *Vicia faba* 39
Soy sauce fermentations, enzymes in 543
Soy yeast, ethyl acetate production by 177
Starch, potato, air classified 101
Storage history of eggs, test for 701
Storage life of,
cream-based liqueurs 587
deboned fish mince 199
fresh water prawns 357
fish, texture measurement during 493
orange juice, browning during 535
pectins 367
Southern blue whiting 185
Sulphur dioxide, effect on ascorbic acid and pigments in frozen capsicums 671

Taste panel tests on blue whiting and whiting 655
  training for meat flavours 661
Tempeh, modified by bakla 39
Tetramethyl benzidine test for storage history of eggs 701
Texture of frozen fish, effect of pH and pre-freezing treatment 493
Textured milk proteins, functional properties of 575
Thermal processes, conversion factors in 229
Turkey muscle protein, gelation property of 549

Ultrasonic pulse echo method to measure biscuit crispness 167

Vacuum packaging films, oxygen transmission through 73
Vicia faba—modified tempeh 39

Water activity,
  evaluation by freezing point depression 21
  lowering in meat during immersion cooking 609, 621
  of salted fish products 31
  prediction 219, 409, 553, 597
Water content of olive husk, determined by NMR 629
  frozen poultry 683
Wheat flour enzymes and effect on cooking quality 127, 213
  prediction of bread baking quality 433
  gluten, solubilization of 561
Whiting, Southern, blue, storage life of 185
Whiting,
  and blue whiting, consumer preference for 655

Yam flour 303
  moisture determination in 457

Zdanovskii–Stokes–Robinson equation for a_w prediction 409
